COHORT OF THE LIGHT

The Thonian Cohorts were formed during the Salvation of Gyan. Alliance Grand Lar Mordis Kilath commanded each of her Highest Echelon Honor Guard to form special Strike Teams to counter the Gyani threat.

Most famous of all was Coria Dirks Cohort who accompanied Kilath, and Cipher Director Terces into the heart of Starlight Gyan and imprisoned its corrupted Council.

Coria and her Cohort then went on to capture an Ordhren Hellion alive - a mission many upper Echelon Commanders deemed impossible.

Coria and her team continued onward to break the Ordhren defenses at Starlight Dire - freeing what was left of the Allied System and the Sentinel forces within.

A Cohort consists of 5 Honor Guard with the Edicts detailed to the left.

Communion

Grants an additional Orbital Support Action during the OS Step.

Detainer

transhumans (h+) that are downed by a model in the Cohort are removed from play and count as 1 point towards victory conditions.
